Answer these questions to show what you know about longitude and latitude.

The line at zero degrees longitude is called: \_\_\_\_\_

Latitude and longitude are measured in: \_\_\_\_\_

The equator is found at \_\_\_\_\_ degrees latitude.

Use the drawings to answer the questions.

A

B

C

D

Which picture shows lines of longitude? \_\_\_\_\_

The measure that demonstrates how far north or south a place is from the equator is shown in picture \_\_\_\_\_

**Directions:**

Using a pen or pencil, mark the area where the *lines of latitude* and *longitude* cross. When you have finished, decide what continent, ocean, or place is located on those coordinates. *The first one has been done as an example*

Coordinates	Continents/Oceans/Place
1. 45 degrees N. Latitude & 90 degrees W. Longitude	1. North America
2. 0 degrees Latitude & 70 degrees W. Longitude	2.
3. 24 degrees N. Latitude & 28 degrees E. Longitude	3.
4. 45 degrees N. Latitude & 90 degrees E. Longitude	4.
5. 90 degrees S. Latitude & 0 degrees Longitude	5.
6. 33 degrees N. Latitude & 8 degrees E. Longitude	6.
7. 75 degrees N. Latitude & 36 degrees W. Longitude	7.
8. 33 degrees N. Latitude & 57 degrees W. Longitude	8.
9. 65 degrees N. Latitude & 155 degrees W. Longitude	9.
10. 27 degrees S. Latitude & 140 degrees E. Longitude	10.
11. 25 degrees S. Latitude & 45 degrees E. Longitude	11.
